# Using less makes much more of a difference

With climate change and sustainability ever-increasing issues on the global agenda, we're rising to the challenge through our commitment to greater water efficiency.

Eleven of our existing WCs have been redeveloped to include new water efficient, low volume, dual flushes.

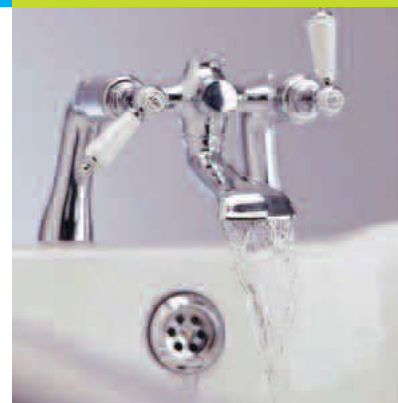

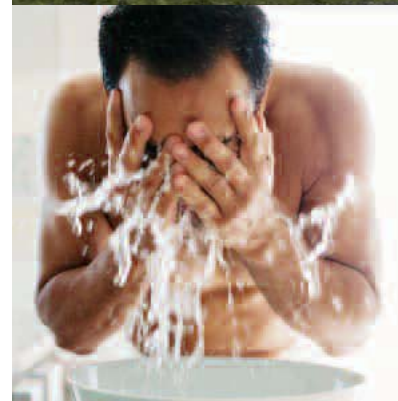

These eco-friendly products use up to a third less water than the average WC. These products can be identified by looking out for the 'ecosense' symbol in this brochure.

Look out for the 'ecosense' symbol

## Planning for the future

However, we've not rested on our laurels and have introduced a number of new ecosense products into our bath, shower and tap ranges this year. These innovations demonstrate our on-going dedication to meeting the growing needs of both the public and the planet!
